Mohammad Mohamed
Software Engineer

Project Experience

Software Engineer Student
We Think Code
Sept 2022 - Dec 2023 (16 months)

- **Toy Robot**
  Used an iterative programming approach to sort bugs, modularize code to evolve the robot to be able to handle commands & navigate obstacles.

- **Systems Integration**
  Led System Integration across multiple servers ensuring proper communication, handling of data consistency and errors.

- **Brownfields: Robot World**
  Program in an existing codebase to change the functionality of the system, user-initiated changes to the system's behavior and add functionality to execute client commands to the server.

Education History

National Certificate in Systems Development from We Think Code
Year of Graduation: 2024

- Brownfields Development
- Distributed Systems
  (HTTP, Web, HTML, CSS, Persistence)
- System Integration

Work and Interests

Chef at Falafel Shop
Food preparation, essential item handling, workstation setup protocols, designated task scheduling, hygiene practices, and minimizing food wastage.
